

Car door operator package

Reliable door operation helps you maintain good people flow and minimises waiting time for passengers. Our car door operator package for lifts with automatic doors replaces the existing operator with modern KONE ReNova™ technology, which ensures quiet opening and closing and features fully adjustable operation speed to suit the needs of your building. Curtain-of-light detection technology improves safety by preventing the door from closing if people or objects are obstructing the door.

KEY BENEFITS

- Improves reliability
- Reduces noise significantly
- Fully adjustable operation speed
- Improves safety with curtain-of-light detection technology

TECHNICAL INFORMATION

- Installation time:
2 working days
depending on
configuration
- Components replaced:
- Door operator
